

New

Lodges, Hotels and our green govino stemless glasses

100% recyclable & SA's greenest glassware.

"It seems as if "new and improved" wineglasses hit the shelves on a weekly basis. But the new GoVino "go anywhere" wineglass does indeed bring something new to the table"

Wine Spectator USA

Lodges, Hotels and govino green wine 'glass'

The govino "go anywhere wine glass" allows for enjoyment of fine wine in settings where breakable glass is not allowed or fine stemware is not available.

The stemless, unbreakable "glass" is not made of glass at all, but from a flexible, **BPA-free**, odourless polymer **PETG**, which reflects a wine's colour and projects its aromatics much like expensive crystal. **Govino is not made from harmful polycarbonate.**

Designed into the glass is an ergonomic thumb notch on the side, giving the user a secure and comfortable grip for swirling and drinking wine. The notch also acts as a stem without a stem, preventing heat transfer into the beverage and potential finger smudging on the crystal-clear surface of the glass.

The glass is shatterproof, reusable and 100% recyclable, and also works for other cold beverages such as cocktails, beer and water.

This is hand wash only! govino was designed for commercial use and can withstand most industrial glass sanitation systems (1-2 minutes at less than 70 °C).

Since domestic dishwashers are so widely varied, we cannot claim our product is 100% "dishwasher safe." The govino wine glass is meant to be replaced after an extended period of use.

Our carbon footprint is 350 times less than glass @ 0.600kg of carbon per 5040 units compared with the 210kg for traditional glass when delivered to the Kruger Park from Cape Town.

PETG is composed of carbon, hydrogen and oxygen, A-PET is non-toxic, 100% recyclable and environmentally friendly. If incinerated, A-PET combusts completely, creating only water and carbon dioxide.

Your guests' wine, and the environment deserve it!

- Branding available at additional cost
- Champagne govino on pre-order only
- Prices are subject to change and subject to currency fluctuation
- Price per pack of 4 R27.40 per glass
